List of Publications (Revised)

(1972-1973)

1972

- *Hujita, A. and T. Ogawa; Patterns of electric field variations due to thunderstorm clouds, *Taiki Denki Kenkyu*, **6**, 59-62.
- Kubotera, A.; On the gravity anomaly eliminating the effect of the low density deposit at the atrio and the structure of Aso caldera, *Bull. Volcanol. Soc. Japan*, **17**, 9-17.
- *Ogawa, T.; Electrical properties of lightning, *Bussei Kenkyu*, **18**, 249-267.
- *Ogawa, T. and S. Otsuka; Electric fields in the stratosphere, *Taiki Denki Kenkyu*, **7**, 44-48.
- *Ogawa, T. and S. Otsuka; Observation of electric fields in the stratosphere, *Proc. IASY Symp. V*, *Inst. Space Aeron. Sci., Univ. of Tokyo*, 456-459.
- *Ogawa, T., S. Otsuka, M. Yasuhara and A. Hujita; Measurement of stratospheric horizontal electric field by using self rotating antennas, *Large Balloon Symp., Inst. Space Aeron. Sci., Univ. of Tokyo*, 111-119.
- *Ogawa, T., Y. Murakami, K. Kagawa and S. Otsuka; Effect of 1-8Å solar X ray flux upon Schumann resonance frequencies, *IASY Symp. V*, *Inst. Space Aeron. Sci., Univ. of Tokyo*, 282-290.
- Otsuka, M., A. Kubotera and T. Higaki; An application of audio tape recorder to seismic observations, *Zisin (J. Seism. Soc. Japan)* **25**, 164-171.
- Takano, K. and S. Imawaki; Elongation d'une cable en nylon, *La mer (Bulletin de la Societe franco-japonaise d'oceanographie)*, **10**, 178-179.
- *Yanagi, T.; On the education of the oceanography—As a student in graduate school, *Marine Sciences*, **4**, 543-545.
- Yusa, Y., T. Torii, K. Nakao and T. Hashimoto; Report of the Japanese Summer Parties in dry valleys, Victoria Land. X. A preliminary report of the geophysical and geochemical studies at Lake Vanda and in the adjacent Dry Valleys in 1971-1972, *Antarctic Record*, **45**, 76-88.

1973

- Araki, T.; Anomalous diurnal changes of transequatorial VLF radio waves, *J. Atmos. Terr. Phys.*, **35**, 693-703.
- *Araki, T., T. Kikuchi, T. Naito and S. Kato; Observation of VLF standard radio waves, *Proc. IASY (International Active Sun Year) Symp.*, **V**, 400-404.
- Hamaguchi, H., H. Watanabe, K. Takano, F. J. Gumper and G. Boucher; Microearthquake Study in northern Honshu, Japan, *J. Phys. Earth*, **21**, 1-18.
- *Higuchi, H., T. Yanagi and M. Kashiwai; On the hydraulic model experiment on the diffusion due to the tidal current(V), *Disast. Prev. Res. Inst., Kyoto Univ. Annuals*, **16**, B, 629-639.
- *Imasato, N.; Momentum transfer from the air to the sea, *Marine Science*, **5**, 5, 312-317.
- Imasato, N., K. Tanaka and H. Kunishi; Study of Seiche in Lake Biwa-ko (IV)—Observation with a new long period water level gauge of portable type, *Contr. Geophys. Inst., Kyoto Univ.*, **13**, 65-72.
- Imawaki, S. and H. Kunishi; Hydrographic section along 23°30'N latitude, *Preliminary Rep. Hakuho Maru Cruise KH-71-3*, 17-24.
- Imawaki, S. and K. Takano; Planetary flow in a circular basin, *Deep-Sea Res.*, (in Press)
- Iwashima, T.; Observational studies of the ultralong waves in the atmosphere (1), *J. Meteor. Soc. Japan*, **51**, 209-229.

* Publication in Japanese.

- Iwashima, T. and R. Yamamoto; Remarks on the analysis of the quasi-stationary and travelling ultra-long waves in the atmosphere, *J. Meteor. Soc. Japan*, **51**, 151–154.
- Maeda, H. and K. Maekawa; A numerical study of polarionospheric currents, *Planet. Space Sci.*, **21**, 8, 1287.
- Maeda, S., S. Handa, T. Ogawa, K. Kawahira and T. Miura; Short period variations of atmospheric temperature and electrical conductivity in the stratosphere, *Contr. Geophys. Inst., Kyoto Univ.*, **13**, 21–33.
- *Miki, H.; The results of co-operative observations of ultramicro-earthquakes. 2. On the seismicity, *Zisin*, **26**, 2, 118–129.
- Naito, Y., T. Araki and S. Kato; Sudden phase anomalies observed at Uji, Report UAG-28 (Prepared by WDC-A for Solar Terrestrial Physics, NOAA, Boulder, Colorado), Part II, 584–585.
- *Nakagawa, I. and M. Satomura; On precise gravity measurement at stations of small gravity difference (Part 2), *J. Geod. Soc. Japan*, **19**, 1, 42–49.
- *Nakagawa, I., M. Satomura, T. Seto, Y. Hasegawa, K. Tsukahara, Y. Hagiwara, H. Tajima, S. Izutsuya, S. Nakai, S. Nakagomi, K. Koizumi, Y. Udagawa, H. Fujimoto and T. Ishihara; On characteristics of LaCoste & Romberg Gravimeters, *J. Geod. Soc. Japan*, **19**, 2, (in Press).
- Nishi, K. and H. Kunishi; Some observations on coastal processes in Tanabe Bay (IV), *Disast. Prev. Res. Inst., Kyoto Univ. Annuals*, **16**, B, 603–617.
- Nishimura, K.; Characteristic features of focal mechanism in and near Kyushu Island (1), *Contr. Geophys. Inst., Kyoto Univ.*, **13**, 101–110.
- Ogawa, T.; Analyses of measurement techniques of electric fields and currents in the atmosphere, *Contr. Geophys. Inst., Kyoto Univ.*, **13**, 111–137.
- Ogawa, T. and S. Otsuka; Comparison of observed Schumann resonance data with the single dipole source approximation theories, *Contr. Geophys. Inst., Kyoto Univ.*, **13**, 7–11.
- Ogawa, T. and Y. Murakami; Schumann resonance frequencies and the conductivity profiles in the atmosphere, *Contr. Geophys. Inst., Kyoto Univ.*, **13**, 13–20.
- *Okano, K. and I. Hirano; Seismic activity in the vicinity of Kyoto, Rep. Coordinating Committee Earthquake Prediction, Min. Constr., **9**, 107–108.
- Okano, K. and I. Hirano; Seismic attenuation in relation to the tectonic force in the vicinity of Kyoto, *Bull. Disast. Prev. Res., Kyoto Univ.*, **22**, 139–152.
- *Ozawa, I.; Forecast of occurrences of earthquakes in Hyogo Prefecture, Rep. Basic Counterplan Earthq. Disast. Hyogo Prefecture, 3–34. (Report)
- Ozawa, I.; The forecast of the occurrences of earthquakes in North-Western part of the Kinki district, *Contr. Geophys. Inst., Kyoto Univ.*, **13**, 147–161. (Report)
- Ozawa, I.; The observation of the rotational strain, and the relation of that of the extensional strains in earth tide, *Contr. Geophys. Inst., Kyoto Univ.*, **13**, 93–100.
- Ozawa, I.; Observations of the tidal extension at Walferdange, *Contr. Geophys. Inst., Kyoto Univ.*, **13**, 85–92.
- Ozawa, I.; Observations of vibrational strains in earthquakes, and relations of the maximum amplitudes to the seismic magnitudes and the epicentral distances, *Bull. Disast. Prev. Res. Inst., Kyoto Univ.*, **22**, Part 2, 1, 1–20.
- *Ozawa, I.; Observations of the vibrational strains in the earthquakes, and the relation of the maximum amplitudes to the seismic magnitude, *Disast. Prev. Res. Inst., Kyoto Univ. Annuals*, **16**, B, 51–65.
- *Ozawa, I.; Supposition of earthquake disaster by means of examination of the ground constitutions in Hyogo Prefecture, Rep. Basic Counterplan Earthq. Disast. Hyogo Prefecture, 119–131. (Report)
- *Ozawa, I., M. Nishiu, N. Hattori, M. Uchida, M. Usui, K. Ishihara and S. Fujii; Examinations of constitutions of the ground in Hyogo Prefecture, Rep. Basic Counterplan Earthq. Disast. Hyogo Prefecture 37–97. (Report)

- *Ozawa, I. and Uchida; Occurrences of Tsunamis in Hyogo Prefecture, Rep. Basic Counterplan Earthq. Disast. Hyogo Prefecture, 101–116. (Report)
- Shimada, M.; Experimental studies of the effect of water on the melting of silicates at high pressures, Crust and Upper Mantle of the Japanese Area, Part II Geology and Geochemistry, Japan National Committee for UMP, 13–17.
- Suzuki, A.; A new analysis of the geomagnetic Sq field, J. Geomag. Geoelectr., **25**, 3, 259–280.
- Suzuki, A.; Returning flow of the equatorial electrojet currents, J. Geomag. Geoelectr., **25**, 3, 249–258.
- Takano, K., H. Hamaguchi and H. Watanabe; Aftershock observation of a southeastern Nevada earthquake at Caliente, J. Phys. Earth, **20**, 409–415.
- Takeuchi, S. and G. Simmons; Elasticity of water-saturated rocks as a function of temperature and pressure, J. Geophys. Res., **78**, 3310–3320.
- *Tanaka, Y.; Continuous observation of crustal movements—Long term movements and anomalous changes forerunning earthquakes—, Rep. 2nd Symp. Earthq. Pred. Res., 35–44.
- *Tanaka, Y. and K. Huzita; Diagnosis of faults—Continuous observation of active fault movements of the Otsuki fault in the Rokko Area, Japan—, Kagaku, **43**, 288–292.
- *Tanaka, Y., M. Koizumi, Y. Hosoi and M. Kato; Crustal movements related to the seismic activity in a restricted area (7)—Relation between the seismic activity in the Uetsu district and the crustal movements observed at the Akatani station—, Disast. Prev. Res. Inst. Kyoto Univ. Annuals, **16**, B, 43–54.
- *Wada, T., Y. Sudo and K. Kamo; Earthquake Swarms at caldera-rim of the Volcano Aso, Bull. Volcanol. Soc. Japan, **18**, 19–31.
- *Watanabe, H.; Determination of earthquake magnitude at regional distance in and near Japan (2nd Report), Zisin, **26**, 2, 160–170.
- *Watanabe, H.; Frequency distribution of magnitude of the ultramicro-earthquakes, Zisin, **26**, 2, 107–117.
- *Yamamoto, R., T. Iwashima and M. Hoshiai; Fluctuations of the atmospheric general circulation and abnormal weather (III), Disast. Prev. Res. Inst., Kyoto Univ., Annuals, **16**,
- *Yanagi, T.; On the flow and the mud property in Mizushima-nada and Hiuchinada, Bull. Coastal Oceanography, **11**, 1, 8–12.

List of Publications

(1972-1973)

1972

- *Hujita, A. and T. Ogawa; Patterns of electric field variations due to thunderstorm clouds, Taiki Denki Kenkyu, **6**, 59-62.
- Kubotera, A.; On the gravity anomaly eliminating the effect of the low density deposit at the atrio and the structure of Aso caldera, Bull. Volcanol. Soc. Japan, **17**, 9-17.
- *Ogawa, T.; Electrical properties of lightning, Bussei Kenkyu, **18**, 249-267.
- *Ogawa, T. and S. Otsuka; Electric fields in the stratosphere, Taiki Denki Kenkyu, **7**, 44-48.
- *Ogawa, T. and S. Otsuka; Observation of electric fields in the stratosphere, Proc. IASY Symp. **V**, Inst. Space Aeron. Sci., Univ. of Tokyo, 456-459.
- *Ogawa, T., S. Otsuka, M. Yasuhara and A. Hujita; Measurement of stratospheric horizontal electric field by using self rotating antennas, Large Balloon Symp., Inst. Space Aeron. Sci., Univ. of Tokyo, 111-119.
- *Ogawa, T., Y. Murakami, K. Kagawa and S. Otsuka; Effect of 1-8Å solar X ray flux upon Schumann resonance frequencies, IASY Symp. **V**, Inst. Space Aeron. Sci., Univ. of Tokyo, 282-290.
- Otsuka, M., A. Kubotera and T. Higaki; An application of audio tape recorder to seismic observations, Zisin (J. Seism. Soc. Japan) **25**, 164-171.
- Takano, K. and S. Imawaki; Elongation d'une cable en nylon, La mer (Bulletin de la Societe franco-japonaise d'oceanographie), **10**, 178-179.
- *Yanagi, T.; On the education of the oceanography—As a student in graduate school, Marine Sciences, **4**, 543-545.
- Yusa, Y., T. Torii, K. Nakao and T. Hashimoto; Report of the Japanese Summer Parties in dry valleys, Victoria Land. X. A preliminary report of the geophysical and geochemical studies at Lake Vanda and in the adjacent Dry Valleys in 1971-1972, Antarctic Record, **45**, 76-88.

1973

- Araki, T.; Anomalous diurnal changes of transequatorial VLF radio waves, J. Atmos. Terr. Phys., **35**, 693-703.
- *Araki, T., T. Kikuchi, T. Naito and S. Kato; Observation of VLF standard radio waves, Proc. IASY (International Active Sun Year) Symp., **V**, 400-404.
- Hamaguchi, H., H. Watanabe, K. Takano, F. J. Gumper and G. Boucher; Microearthquake Study in northern Honshu, Japan, J. Phys. Earth, **21**, 1-18.
- *Higuchi, H., T. Yanagi and M. Kashiwai; On the hydraulic model experiment on the diffusion due to the tidal current(V), Disast. Prev. Res. Inst., Kyoto Univ. Annuals, **16**, B, 629-639.
- *Imasato, N.; Momentum transfer from the air to the sea, Marine Science, **5**, 5, 312-317.
- Imasato, N., K. Tanaka and H. Kunishi; Study of Seiche in Lake Biwa-ko (IV)—Observation with a new long period water level gauge of portable type, Contr. Geophys. Inst., Kyoto Univ., **13**, 000-000.
- Imawaki, S. and H. Kunishi; Hydrographic section along 23°30'N latitude, Preliminary Rep. Hakuho Maru Cruise KH-71-3, 17-24.
- Imawaki, S. and K. Takano; Planetary flow in a circular basin, Deep-Sea Res., **20**, 000-000.
- Iwashima, T.; Observational studies of the ultralong waves in the atmosphere (1), J. Meteor. Soc. Japan, **51**, 209-229.

* Publication in Japanese.

- Iwashima, T. and R. Yamamoto; Remarks on the analysis of the quasi-stationary and traveling ultra-long waves in the atmosphere, *J. Meteor. Soc. Japan*, **51**, 151–154.
- Maeda, H. and K. Maekawa; A numerical study of polarionospheric currents, *Planet. Space Sci.*, **21**, 8, 1287.
- Maeda, S., S. Handa, T. Ogawa, K. Kawahira and T. Miura; Short period variations of atmospheric temperature and electrical conductivity in the stratosphere, *Contr. Geophys. Inst., Kyoto Univ.*, **13**, 000–000.
- *Miki, H.; The results of co-operative observations of ultramicro-earthquakes. 2. On the seismicity, *Zisin*, **26**, 2, 118–129.
